INFRASTRUCTURE & GITHUB FEEDBACK

Group Number: 2
Date: 02/04/24
TA Assessing: Rimsha Rizvi

In general, your GitHub seems to be actively used and has submissions posted exactly where they belong, which is great. For the following weeks, please implement the following changes to your GitHub submissions as it would affect your grade in the future:

- Although weekly reports are submitted as PDFs, the coding scenario is not. Make sure all documents are submitted as a PDF.
- The coding scenario outlines a narrative that you are attempting to implement for the first release. Give the file a more meaningful title. For reference, notice that the professor mentioned "Environmental Scenario" for his adventure game in the sample.
- All members should actively participate in GitHub submissions/commits.

The only individual (Utsav Sharma) who has somewhat populated Jira is the one who sent me the invitation. I cannot view them in the project anymore either. If this is an error, please let me know. Each member must work as a team and be actively involved the entire time. Failure to do so would result in your grades being affected negatively. As a result, I cannot provide any specific feedback. However, here is what we generally look out for:

1. All members have accessed Jira (or equivalent) and have assigned task(s) to themselves. Additionally, for simplicity of member identification, please ensure that each member in the group has a unique avatar.
2. There are items in the backlog at all times.
3. Each sprint follows the deadline as presented in the schedule section displayed on the course website (starting and ending at the correct times)
4. Tasks need to have changed states (from "To Do" to "In Progress" to "Done") as the week progresses. This does not mean that each task needs to be completed by the end of the week as it is highly dependent on the group's progress.
5. Try to maintain the correct structure for writing stories - "As a _, I want _, so that _". Good stories follow INVEST rules. If you want, you can add sub-tasks to each story once it is created.
6. If there is an option to mention story points / the estimated "effort" for each story, please include it for all stories.

Please contact the instructors/TA if you need assistance as we will be grading this progress this week onwards.
